

Pflect-A

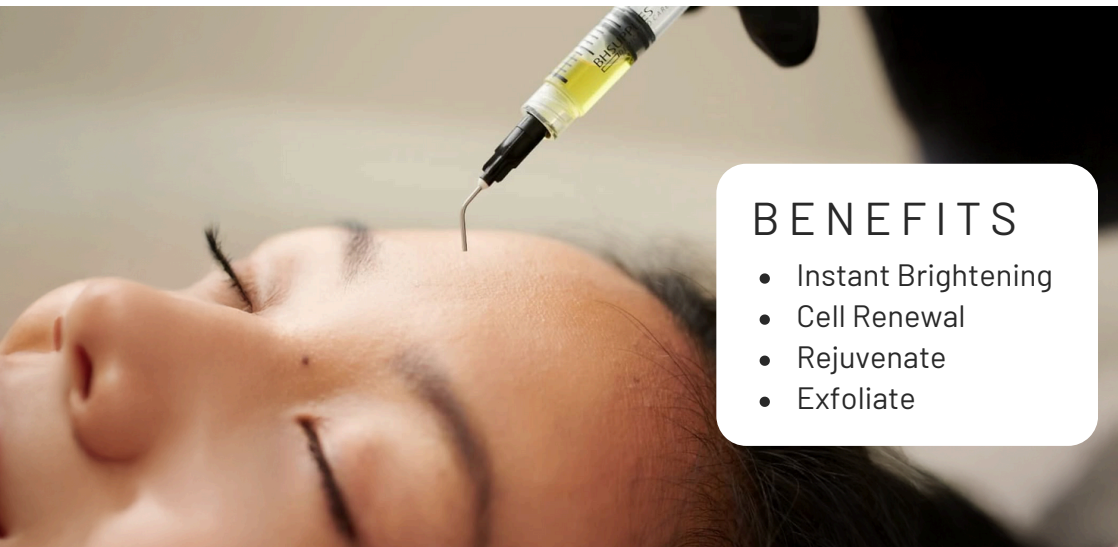

ILLUMIN

Biphasic Peeling Solution

A dual-phase exfoliating solution powered by multi-acid, multi-vitamin, and a rejuvenating complex to resurface, brighten, and renew the skin. The acid phase exfoliates, while the lipid phase restores, leaving your complexion smoother, more radiant, and irritation-free.

ILLUMIN

Biphasic Peeling Solution

BENEFITS

- Instant Brightening
- Cell Renewal
- Rejuvenate
- Exfoliate

MULTI ACID, VITAMINS + REJUVENATING COMPLEX

Containing 4 types of Major Acids, mainly TCA, AHA, BHA and PHA to instantly provide brightened, smoothed and resurfaced skin, without the downtime and pain associated.

TCA

Removes the damaged surface layer of the skin. Helps improve the appearance of age spots, wrinkles, scars, and rough skin.

BHA

Softens dead skin cells, helps with exfoliation, blemishes, clear and refine pores.

AHA

Promotes skin cell regeneration, Increase collagen density, and improves skin elasticity. Helps to achieve glossy skin.

PCA

Promotes skin cell regeneration, Increase collagen density, and improves skin elasticity. Helps to achieve glossy skin.
